### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 34-39, 46-49 are rejected under 35 U.S.C. 102(b) as being anticipated by the publication entitled "Vision by telephone" for the same reasons given in the last Office action and repeated below.

The publication discloses a system for monitoring a plurality of scrutiny locations from a central station using dial-up telephone facilities in which images from each scrutiny location are sequentially received and displayed along with graphic display data identifying the picture displayed (page 2). When an alarm sensor at a scrutiny location is triggered, the associated camera takes four snap-shots which are stored and transmitted to the called central station for priority display such that the usual surveillance sequence is interrupted (page 2, column 1, paragraph 4). Two-way audio communication can take place via telephones at each remote site and the central station (see figures on pages 2-3).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2743

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 40-45, 48, 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over the "Vision by telephone" publication in view of Thompson for the same reasons given in the last Office action and repeated below.

The publication differs from claims 40-45, 48, 51 in that it does not provide for storing display data on scrutiny locations with means for addressing the memory means based on "D" channel type signals. However, Thompson teaches the storage of display data (map, address, name, etc.) corresponding to different scrutiny locations and addressing the data based on ANI information (col. 3, lines 1-53) for the purpose of providing more detailed information with regard to an emergency call. It would have been obvious to incorporate such storage and addressing means within the system described in the publication in order to provide a central monitoring station with more detailed information of a calling scrutiny location in need of emergency help.

5. Claims 26-33, 50 are allowed.

6. Applicant's arguments filed November 3, 1997 have been fully considered but they are not persuasive.

The successive snapshots taken in the "Vision by telephone" publication can be considered as "dynamic" in that the images taken differ as the scene changes.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2743

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.
